

Good Afternoon.

In this newsletter:

- Take care - its easy to get tricked!
- BACKUPS a reminder

Take care - its easy to get tricked!

If you are unfortunate enough to get certain types of malware/viruses/malicious software installed on your computer you can then be at risk from being hacked, monitored and open to identity theft. We all know we are monitored by our wonderful government security departments but imagine a fraudster watching as you login to your online bank, that is what some malicious software can do! Take care.

Think you are safe? Think again. Even when the most updated anti-virus/malware software is used you can still be at risk from unknown/unreported malware and viruses. Therefore, you must be continually vigilant. Emails can be received with attachments appearing to be valid invoices, receipts, payment requests, flight confirmations, companies house documents, etc. and are very convincing as they seem to be from one of your known contacts. This then lulls you into a false sense of security so you open the attached file which ultimately infects your system quietly in the background.

BACKUPS a reminder

A reminder: maintaining your own independent backup is essential for your own data security.

We have provided full details on how to backup all types of our hosting accounts here:

<http://www.seiretto.com/newsletters/backups.php>

and the **backup/view of DNS** is available for all hosted/managed domains,

login here: <https://seiretto.co.uk/clients/login/>

then login to the relevant control panel, search for the relevant dns page and copy the DNS. This allows clients to backup and/or view the DNS data for any domain hosted or managed by us.

If you are having issues with backups of any of your data (dns, web files, database) please reply now and we will assist.

Please visit and like us, or maybe post a comment:
